Problem

This is the Quiz Organizer. A teacher can conduct a quiz with it. Teacher can compose a quiz, upload the quiz, manipulate (alter) the quiz and can have a record of the student marks. Teacher would upload the paper and the students will login with their respective student ids and attempt the quiz. After the quiz their marks will be displayed and would be saved for the future record. All the data will be saved in the local files as the. Local Files will be used as the Database.

The screenshot displays the web interface of the Quiz Organizer. At the top, a browser window shows the URL `localhost/quizonline/index.php`. The header features a blue banner with the text "QUIZ Online Quiz!" on the left, a graphic of a human head profile with gears inside on the right, and a large "Quiz" logo with a clock icon and a blue arrow pointing to it. Below the banner, the main content area is divided into two sections. The left section contains a welcome message: "Welcome to Online QUIZ Management System" followed by a paragraph describing the system's features (XML database, PHP development, registration, login, and quiz configuration). Below this text is a blue "Register" button. The right section contains a login form with a blue header bar, followed by "User Name:" and "Password:" labels, each with a corresponding white input field. Below the input fields is a blue "Login" button. At the bottom of the page, a footer bar contains the text "Copyright © 2014 Online Quiz Project. All rights reserved."

solutions

Teacher

Can set the paper for students.

Student

Can login and take the quiz.

Database

All the data can be saved for the future reference.

Local Files

Local Files are used as the Database. Every Student and the subject teacher would have a separate file.

Exception Handling

All types of Exceptions are dealt with separately in a file based system.

Navigation Keys

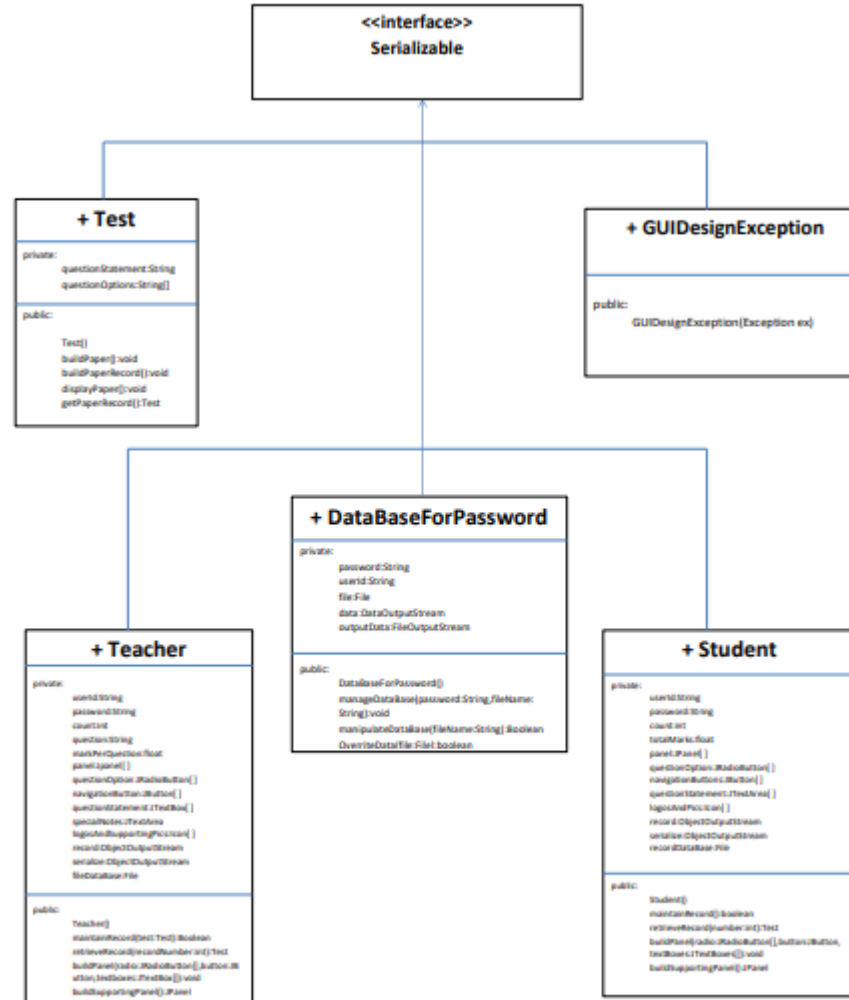

Any question can be accessed at any time.

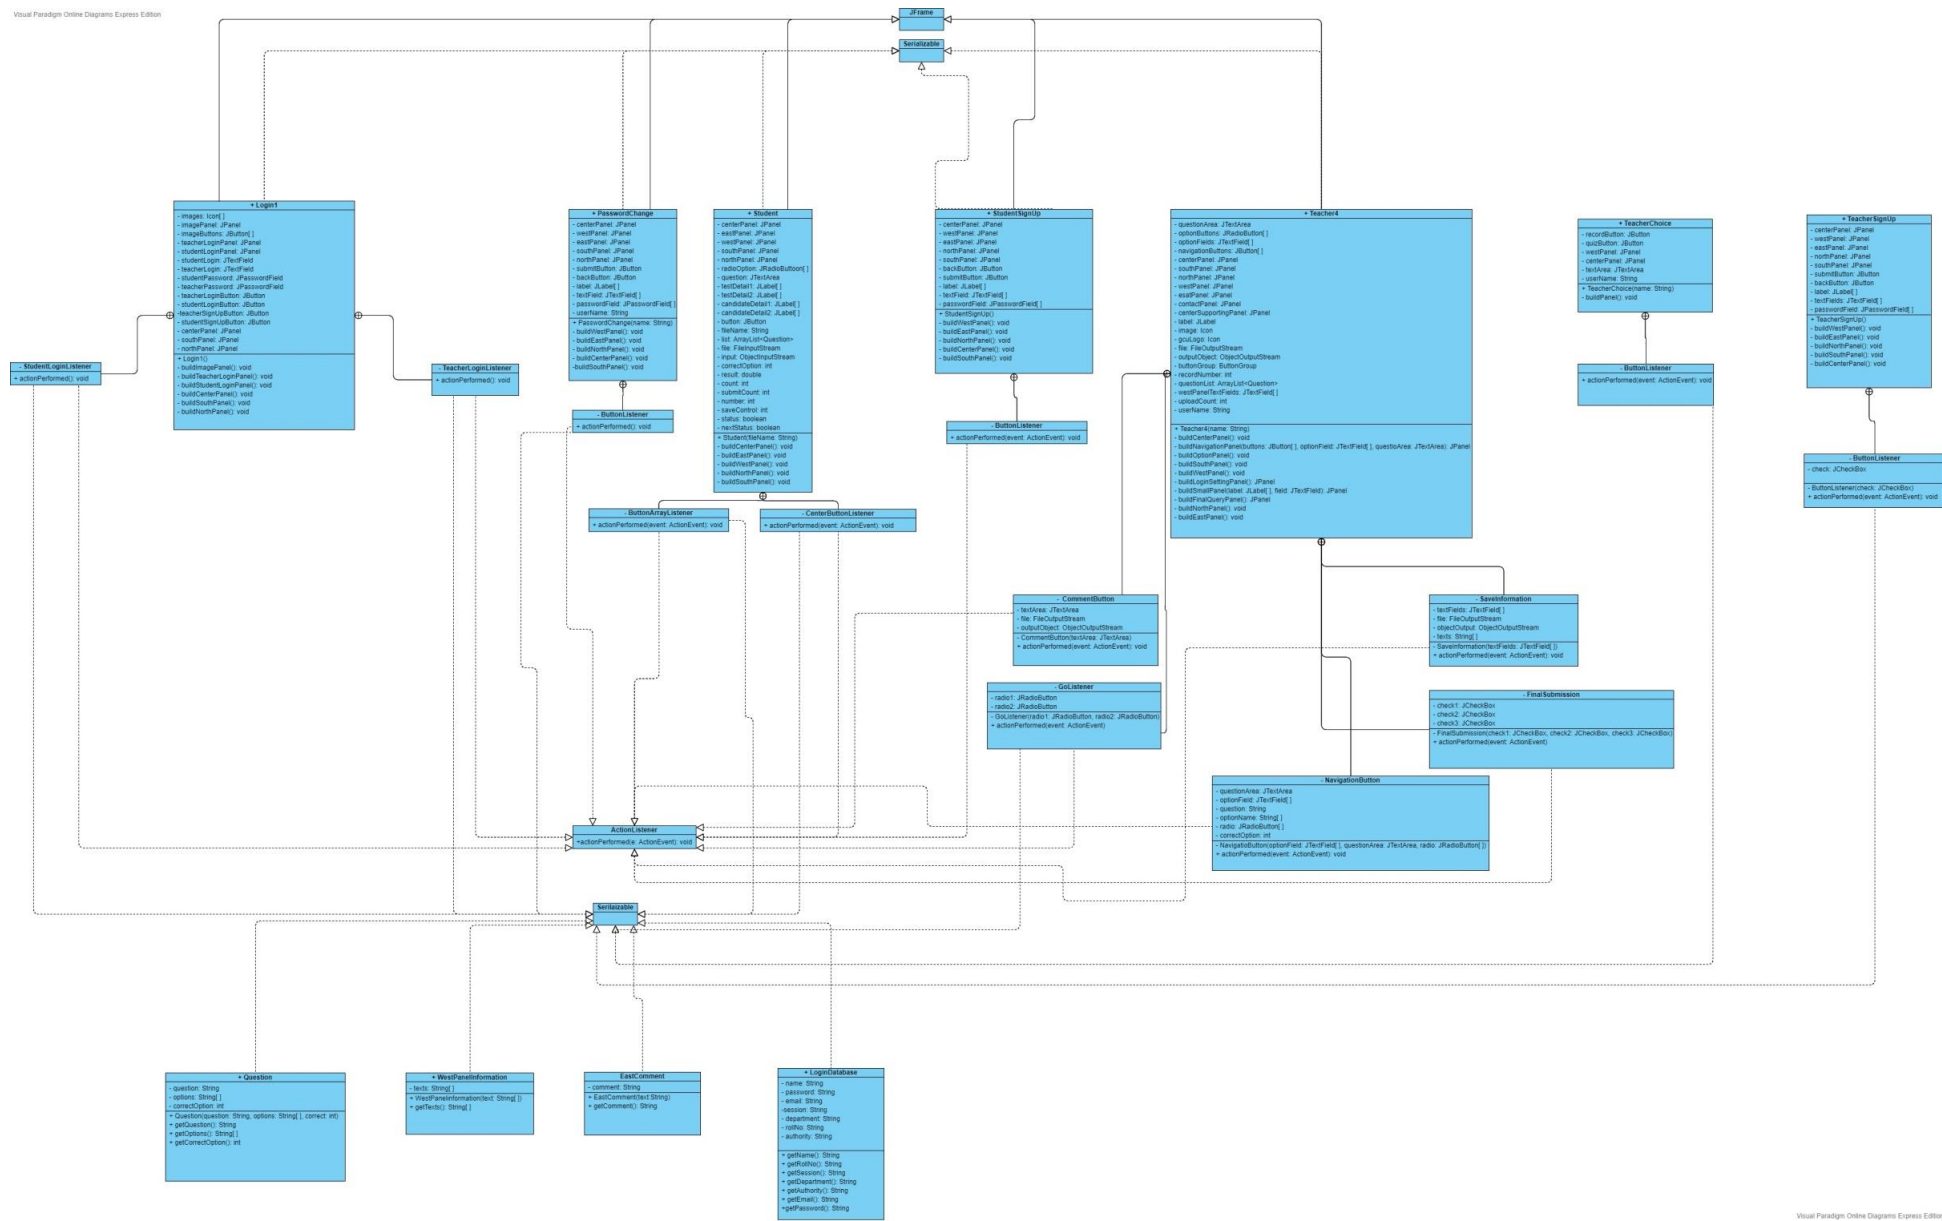

Friendly User Interface

All the work is done in a user friendly interface.
